1. Identification of the Substance/Mixture and the Supplier

Supplier: National Institute of Advanced Industrial Science and Technology (AIST)
Address: 1-3-1, Kasumigaseki, Chiyoda, Tokyo, Japan
Office in Charge: Reference Materials Office, Center for Quality Management of Metrology, National Metrology Institute of Japan (NMIJ)
Person in Charge: Person in Charge of Certified Reference Materials
Telephone No.: +81-29-861-4059
Fax No.: +81-29-861-4009
Emergency Contact: Same as above

Prepared on: August 29, 2007
Revised on: March 31, 2017
ID Number: 4020001

Identity of Substance/Mixture: Certified reference material NMIJ CRM 4020-a
Recommended Use of the Chemical and Restriction on Use:
This CRM is primarily intended for use in calibrating analytical instruments. It is also intended for quality control of analytical instruments, and validation of analytical techniques and instruments. Do not use this reference material for other purposes than testing/research.

2. Hazards Identification

GHS Classification:
- Acute Toxicity (Oral): Hazard Category 4
- Carcinogenicity: Hazard Category 2
- Specific Target Organ: Hazard Category 2 (Liver)
- Toxicity/Systemic Toxicity (Repeated Exposure): Hazard Category 2 (kidney)
- Water environment toxicity (Acute): Hazard Category 3
- Water environment toxicity (Prolonged): Hazard Category 3

GHS Label Element:

Signal Word: Warning
Hazardous Statement: Harmful if swallowed.
Suspected of causing cancer
May cause damage to organs (liver, kidney and thyroid gland) through prolonged or repeated exposure
Harmful to aquatic life
May cause damage to aquatic life through prolonged or repeated exposure

Other hazard and: toxicity
Precautionary Statement: [Precaution]
Do not handle until all safety precautions have been read and understood.
Avoid release to the environment.
Do not eat, drink or smoke when using this product.
Wash hands thoroughly after handling.
Use personal protective equipment if necessary.
Avoid breathing vapors.
[First-aid Action]
If swallowed: Rinse mouth. Get medical advice/attention.
If you feel unwell: Get medical advice/attention.
If exposed or concerned: Get medical advice/attention.
[Storage]
This CRM should be kept in locked and keyed.
Store this CRM in dark, cool (about −20 °C), clean and well ventilated place, and seal tightly after use.
[Disposal]
Incinerate contents/containers in an incinerator equipped with scrubber. When the above-mentioned treatments are not possible, entrust disposal of residual waste to a professional waste disposal company licensed by prefectural governor.

The other hazards than the above do not result in classification or are not classifiable.

3. Composition/Information on Ingredients

4. First-aid Measures

If in eyes: Rinse cautiously with clean water for several minutes. Remove
contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

If on skin : Rinse cautiously with clean water. If irritation persists: Get medical advice/attention.

If inhaled : Remove victim to fresh air and keep at rest and warm. Get medical advice/attention. If necessary, give artificial respiration and oxygen inhalation.

If swallowed : Rise mouth thoroughly with water. Induce vomiting by sticking finger down throat if possible. Get medical advice/attention immediately.

Expected Acute and Delayed Symptom : -
Most Critical Characteristic and Symptom : -
Protection of First-Aid Responder : Use personal protective equipment.

5. Fire-fighting Measures

Extinguishing Media : This material is incombustible. Use a fire extinguishing agent suitable for surrounding fire.

Fire-Specific Hazards : In case of fire, may emit irritating or toxic fume (or gas).

Specific Fire-Fighting Method : Eliminate ignition sources at the origin of a fire and put out fire by using extinguishing media. Remove movable containers promptly to a safe place. In the case of immovable containers, cool their surroundings with sprayed water.

Protection of Fire-Fighters : Carry out fire-fighting from the windward in order to avoid breathing hazardous gas. Use personal protective equipment such as fireproof clothing, heat-resistant clothing, protective clothing, compressed air open-circuit self-contained breathing apparatus, compressed oxygen closed-circuit self-contained breathing apparatus, rubber gloves and rubber boots.

6. Accidental Release Measures

Personal Precaution : Remove ignition source in the vicinity immediately. Prepare fire-fighting equipment for the possibility of fires.

Personal Protective Equipment and Emergency Procedures : Ventilate the affected areas thoroughly, if it is in an indoor environment, until the clean-up operation is completed. Use appropriate personal protective equipment during the operation to avoid skin contact of splash etc. and inhalation of dust and gas.

Environmental Precautions : Take precautions to prevent spillage from draining into rivers etc. to adversely impact the environment. Make it sure to appropriately treat contaminated wastewater in order to prevent untreated wastewater from being released into the surrounding
Recovery and Neutralization: Collect spillage in empty containers by getting it adsorbed to wiping cloth, rag or earth and sand, etc. Use waste clothes or wiping clothes and wipe off completely.

Prevention of Secondary Disaster: Mark the restricted area with rope etc. to keep out unauthorized people. Carry out the clean-up operation from the windward and make people on the leeward side evacuate.

7. Handling and Storage

Handling Engineering Precautions: Store on a floor surface which can prevent permeation into underground. Do not allow vapor generation.

Local and General Ventilation Precautions for Safe Handling: Avoid rough handling such as turning over, dropping, giving a shock to or dragging containers. Prevent spill, overflow and scattering, and avoid vapor generation. Keep container tightly closed after using this reference material. Wash hands, face etc. thoroughly and gargle after handling this reference material. Do not bring gloves and other contaminated personal protective equipment into staff room. Make a place handling this reference material a restricted area to keep out unauthorized people. Use appropriate personal protective equipment to avoid inhalation and contact with eyes, skin and clothing.

Storage Appropriate Storage Conditions: Keep in locked and keyed. Store in a closed container in a clean light-shielded place at temperatures around −20 °C. Avoid storing together with oxidizers and strongly oxidizing substances.

Safe Container Packaging Material: Glass

8. Exposure Controls/Personal Protection

Threshold Limit Value
Not specified

Permissible Concentration
- ACGIH TLV-TWA: Not specified
- Value recommended by Japan Society for Occupational Health: Not specified
- OSHA PEL TWA: Not specified

Engineering Controls
Ventilation/Exhaust: Local ventilation system or General ventilation system
Safety Control/Gas Detection: Measuring equipment, Detecting tube
Storage Precaution: -

Personal Protective Equipment (PPE)
- Respiratory System: Protective gas mask for organic vapors, Self-contained compressed air breathing apparatus.
- Hands: Impervious protective gloves
- Eyes: Eye protector with side plates (or Goggle type)
- Skin and Body: Protective clothing with long sleeves, protective face mask etc.

Hygiene Controls
Replace adsorbent of masks etc. regularly or before use.

9. Physical and Chemical Properties

10. Stability and Reactivity

◆ Stability
  - Deteriorated by light
◆ Reactivity
  - No data
◆ Conditions to Avoid
  - Sunlight, Heat.
◆ Hazardous Decomposition Products
  - Carbon monoxides, Halides

11. Toxicological Information

Acute Toxicity
- Oral – Rat: LD50 : 430 mg/kg (RTECS)
Oral – Mouse  LD50 : 450 mg/kg (RTECS)
Inhalation – Rat  TCLo : 100 ppm/4H (RTECS)
651 mg/kg (IARC 52, 1992)
430 mg/kg (ATSDR, 1989)

Carcinogenicity
Reasonably anticipated to be human carcinogen (NTP: Group b, IARC: Group 2B, Japan Society for Occupational Health: Group 2B, and EPA: Group B2)

Specific Target Organ Toxicity/Systemic Toxicity (Repeated Exposure)
It is reported that, in the long-term oral administration test using rats and mice, effects on liver including fatty degeneration of hepatocyte as well as effects on kidney including renal tubular degeneration were observed at the doses within the range of the Guidance values for Category 2 (IARC 71 (1999), ATSDR (1989), IRIS (2006), NTP TR 321 (1987) and NTP DB (2006)). It is also reported that, in the oral administration test using mice, hyperplasia of thyroid gland follicular cells was observed at the doses within the range of the Guidance values for Category 2 (NTP TR 321 (1987) and IRIS (2006)).

12. Ecological Information
Degradability, bioacumulation properties
- No data
Bioaccumulative Potential
- No data
Ecotoxicity
- Algae (Selenastrum): 72 hours  ErC50 = 12mg/L (Ministry of Environment “Ecological Effect Test (1995)”)

13. Disposal Considerations
- Incinerate this reference material in an incinerator equipped with afterburner and scrubber.

14. Transport Information
UN Number  : 2810
UN Classification : Class 6.1 (Poisonous material)
Shipping Name : Bromodichloromethane
Packing Group : PG III
ICAO/IATA: Class 6, III
Marine Pollutant: Not specified
Precautions: Transport this reference material carefully while keeping it away from direct sunlight and preventing accidental release due to falling, overturning, etc. at about −20 °C

15. Regulatory Information
◇ Industrial Safety and Health Act
  • Article 57-2 (Enforcement Order: Article 18) Hazardous substance whose name, etc. must be labeled.
  • Article 57-2 (Enforcement Order: Article 18-2) Hazardous substance whose name, etc. must be notified No. No.501
◇ Ship Safety Law
  • Poisonous substance
◇ Pollutant Release and Transfer Register (PRTR) Law
  • Class 1 Designated Chemical Substance No. 381

16. Other Information
Others
The information in this document is not intended to be exhaustive and is based on currently available information and data. The measures given in this document are applicable only to normal handling conditions. When handling this reference material under special conditions etc., it is recommended to take safety measures appropriate to each specific application and context of use. This document is intended to provide information and not intended to guarantee anything in handling this reference material.
