1. Identification of the Substance/Mixture and the Supplier

Supplier: National Institute of Advanced Industrial Science and Technology (AIST)
Address: 1-3-1, Kasumigaseki, Chiyoda, Tokyo, Japan
Office in Charge: Reference Materials Office, Center for Quality Management of Metrology, National Metrology Institute of Japan
Person in Charge: Certified Reference Material Staff
Telephone No.: +81-29-861-4059
Fax No.: +81-29-861-4009

Prepared on: August 8, 2009
Revised on: March 31, 2017
ID Number: 4216001

Identity of Substance/Mixture: Reference material: NMIJ RM 4216-a
Recommended Use of the Chemical and Restriction on Use:

This RM is intended for use in calibration of instruments and validation for analytical techniques during the determination of sulfur in liquid samples.

Do not use this reference material for other purposes than testing/research.

2. Hazards Identification

GHS Classification:

- Flammable liquid: Hazard Category 2
- Acute toxicity (Oral): Hazard Category 5
- Acute toxicity (Inhalation): Hazard Category 4
- Skin corrosion/irritation: Hazard Category 2
- Serious eye damage/eye irritation: Hazard Category 2B
- Reproductive toxicity: Hazard Category 1A
- Specific target organ toxicity/Systemic toxicity (Single exposure): Hazard Category 1 (Central nervous system)
  Hazard Category 3 (Narcotic effects)
  Hazard Category 3 (Respiratory tract irritation)
- Specific target organ toxicity/Systemic toxicity (Repeated exposure): Hazard Category 1 (Central nervous system)
  Hazard Category 1 (Liver)
  Hazard Category 1 (Kidney)
- Aspiration respiratory hazard: Hazard Category 1
- Aquatic toxicity (Acute): Hazard Category 2
GHS Label Element:

Signal Word: Danger
Hazards Statement: Highly flammable liquid and vapor
Skin irritation
Eye irritation
May be harmful if swallowed
Harmful by inhalation
May have adverse effects on sexual function and fertility or embryo/fetus
Organ dysfunction (Central nervous system)
May lead to irritation of respiratory system
May lead to drowsiness or dizziness
May cause damage to organ by prolonged or repeated exposure (Central nervous system, kidney and liver)
May be fetal if swallowed or if aspirated into respiratory tract
Aquatic toxicity

Other Hazards: May cause serious poisoning through vapor inhalation

Precautionary Statement:

[Precaution]
Use eye protector/face protector/gloves.

Prevent release of this reference material to the environment.
Obtain the certificate of this reference material prior to use, and do not handle it before reading and understanding all safety precautions.
Use this reference material only in an outdoor or well-ventilated environment.
Wash hands thoroughly after handling this reference material.
Keep this reference material away from heat/spark/open flame/high-temperature items. No smoking.
Avoid mist/vapor inhalation.
In case of fire, use appropriate fire-extinguishing means.
Take off contaminated clothing and wash it when it is reused.

[Action]
Eye contact: Irrigate eyes carefully with water for a few minutes. Then take out contact lenses if it is possible to easily do so. Keep irrigating eyes after taking out contact lenses. Seek medical examination/treatment if eye irritation is prolonged.
Seek medical attention when feeling sick.
Ingestion: Seek medical attention when feeling sick. Flush mouth. Do not make the person vomit.
Inhalation: Move the person to fresh air and keep him/her at rest in an easy-to-breathe position.
Skin contact: Take off all contaminated clothing immediately. Flush exposed skin area with running water. Seek medical examination/
treatment if skin irritation develops. When being exposed or when there are concerns about exposure:
Seek medical examination/treatment.

[Storage]
Store this reference material in a locked storage. Store this reference material in a light-shielded clean environment at about 5 °C.

[Disposal]
Incinerate this reference material and its containers in an appropriate incinerator. Or entrust disposal of this reference material and its containers to a professional waste disposal company licensed by prefectural government.

The other hazards than the above do not result in classification or are not covered by the GHS.

3. Composition/Information on Ingredients

4. First-aid Measures

| Eye Contact | Irrigate eyes thoroughly with clean water. Seek medical examination/treatment. |
| Skin Contact| Flush exposed skin area thoroughly with clean water. Take off contaminated clothing and shoes. Seek medical examination/treatment. |
| Inhalation  | Move the person to fresh air and keep him/her at rest and warm. Seek medical examination/treatment. |
| Ingestion   | Flush mouth thoroughly with water. Seek medical attention. |
| Expected Acute Symptoms and Delayed Symptoms | Dizziness, headache, nausea, hangover | May be fatal in a worst case |
| The Most Critical Characteristics and Symptoms | - |
Protection of First-Aid Provider: Use personal protective equipment such as rubber gloves and hermetically-sealed goggles.

5. Fire-fighting Measures

Extinguishing Media: Dry-powder-type extinguisher, foam extinguisher, CO₂, dry sand, water spray (Do not use water jet)

Fire-Specific Hazards: Use appropriate personal protective equipment so as to avoid smoke inhalation during fire-fighting.

Specific Fire-Fighting Method: Eliminate combustion sources at the origin of a fire and put out fire by using extinguishing media. Move movable containers immediately to a safe place. In the case of immovable containers, cool their surroundings with sprayed water.

Protection of Fire-Fighters: Carry out fire-fighting from the windward in order to avoid inhalation of hazardous gas. Use personal protective equipment such as oxygen mask.

6. Accidental Release Measures

Personal Precaution: Immediately remove potential ignition sources from surrounding areas. Make fire-extinguishing tools available to prepare for fire ignition.

Personal Protective Equipment and Emergency Procedures: Ventilate the affected area thoroughly until the clean-up operation is completed when accidental release takes place indoor. Use appropriate personal protective equipment during the operation to avoid skin contact of splash etc. and inhalation of dust and gas.

Environmental Precautions: Take precautions to prevent the spilled toluene from draining into rivers etc. to adversely impact the environment. Make it sure to appropriately treat contaminated wastewater in order to prevent untreated wastewater from being released into the surrounding environment.

Recovery and Neutralization: Strict ban on fire. Collect spilled toluene in empty hermetically-sealed containers by making it adsorbed to waste cloth, soil, sand etc. Thoroughly wipe out the spilled toluene.

Secondary Disaster Prevention Measures: Mark the restricted area with rope etc. to keep out unauthorized people. Carry out the clean-up operation from the windward and make people on the leeward side evacuate.

7. Handling and Storage

Handling Engineering Precautions: Strictly ban on fire. Avoid contact with high-temperature items, spark and strong oxidizing agents. Handle toluene carefully as it is apt to build up static electricity. Use appropriate personal protective equipment.

Local and General: Use local ventilation system in indoor handling areas.
Ventilation
Precautions for Safe Handling:
Avoid rough handling such as turning over, dropping, giving a shock to or dragging containers.
Prevent spill, overflow and scattering, and avoid vapor generation.
Wash hands, face etc. thoroughly and gargle after handling this reference material.
Restrict drinking, eating and smoking to a designated area.
Make a place handling this reference material a restricted area to keep out unauthorized people.
Use appropriate personal protective equipment to avoid inhalation and contact with eyes, skin and clothing.

Storage
Appropriate Storage Conditions:
Use explosion-proof electrical devices in storage areas. Ground all the devices.
Store this reference material in a light-shielded clean environment at about 5 °C. Strict ban on fire.
Do not store this reference material in the vicinity of strong oxidizing substances and ignition sources.

Safe Container Packaging Material:
Glass

8. Exposure Controls/Personal Protection
Cut-Off Value/Concentration Limit
Working environment assessment criteria: 20 ppm
Permissible Concentration
- ACGIH TLV-TWA: 20 ppm, A4:BEI
- Value recommended by Japan Society for Occupational Health: 50 ppm, 188 mg/m³; Percutaneous absorption
- OSHA PEL TWA: 200 ppm; CL 300; Pk 500/10M

Engineering Controls:
Facilities to irrigate eyes and wash hands and body must be installed and labeled in the vicinity of a place handling this reference material.
Local ventilation system or general ventilation system

Safety Control/Gas Detection
Detector

Precautions for Storage: Ventilation along floor surface

Personal Protective Equipment (PPE)
PPE for Respiratory System: Mask to avoid organic gas inhalation and oxygen mask
PPE for Hands: Protective gloves
PPE for Eyes: Eye protector
PPE for Skin and Body: Protective clothing
Hygiene Measures: Replace adsorbents of masks etc. regularly or in every use.
Check rubber part etc. carefully as this reference material attacks rubber etc.

9. Physical and Chemical Properties

- Appearance, etc.: Liquid
- Color: Clear and colorless
- Odor: Characteristic odor
- pH: No data
- Melting point: $-95 \, ^\circ C$
- Boiling point: $110.6 \, ^\circ C$
- Flashing point: $4 \, ^\circ C$
- Explosive range: 1.2 vol % to 7.1 vol % (in the air)
- Vapor pressure: 49 hPa (30 °C)
- Relative vapor density (Air=1): 3.1 (air = 1)
- Specific gravity or bulk specific gravity: 0.861 to 0.872 (20 °C)
- Solubility: Insoluble in water (0.05 g/100 mL water, 25 °C) Miscible with ethanol and ether
- Octanol/water partition coefficient (Log Po/w): 2.69
- Auto-ignition temperature: 480 °C

10. Stability and Reactivity

◇ Stability
  - Properties changed by light

◇ Reactivity
  - May generate heat and be ignited when contacting with oxidizing agent

◇ Conditions to Avoid
  - Sun light, heat, open flame, high temperature, spark, static electricity and other ignition sources

◇ Hazardous Decomposition Products
  - Carbon monoxide and carbon dioxide

11. Toxicological Information

<table>
<thead>
<tr>
<th>Acute Toxicity</th>
<th>Oral</th>
<th>Rat</th>
<th>LD50: 636 mg/kg (RTECS)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Inhalation</td>
<td>Rat</td>

</tr>
<tr>
<td>Dermal</td>
<td>Rabbit</td>
<td>LD50: 14100 µL/kg (RTECS)</td>
<td></td>
</tr>
<tr>
<td>Oral: Oral administration to rat: LD50=2,600, 5,500, 5,580, 5,900, 6,400, 7,000 and 7,530 mg/kg (EU-RAR No.30 (2003))</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| Inhalation: Classified, by applying a formula, based on LC50 (4 hours) of inhalation exposure to rat: 12.5, 28.1, 28.8, 33 mg/L (EU-RAR No.30 (2003)). When using conversion factor (25 °C) of 1 mg/m$^3$ = 0.265 ppm, LC50 (calculated value) = 18 mg/L is calculated to be 4,800 ppm. Saturated vapor pressure
concentration (25 °C) is 33,000 ppm when saturated vapor pressure (25 °C) is 3.3 kPa. LC50 of 4,800 ppm, therefore, is found lower than 90% of the saturated vapor pressure concentration. Consequently it is considered to be “vapor with little mist.” (NITE)

**Skin Corrosion/Irritation**

<table>

</table>

**Germ Cell Mutagenicity**

Chromosome aberration test: Inhalation – Rat

**5400 μg m⁻³/16 weeks – Intermittent administration**

**Specific Target Organ Toxicity/Systemic Toxicity**

Toluene, which is quickly absorbed by humans mainly through inhalation, acts on central nervous system. Toluene inhalation of 50 ppm - 100 ppm causes fatigue, drowsiness, dizziness and light irritation to respiratory system. Toluene inhalation of 200 ppm-400 ppm causes excitation, accompanied by dysesthesia and nausea. Toluene inhalation of 500 ppm-800 ppm causes central nervous depression, intoxication, obfuscation and toppling gait, etc. (“CERI Hazard Data Collection” 96-4 (1997)). It is also reported that toluene causes irritation to eyes, nose and throat (EU-RAR No.30 (2003)) and that it has narcotic effects on laboratory animals (EU-RAR No.30 (2003)) etc.

**Specific Target Organ Toxicity/Systemic Toxicity**

Toluene causes drug dependence. It is reported that addicted inhalation causes headache accompanied by visual field constriction or nystagmus and hearing impairment, tremor, ataxia and chronic central nervous disorder such as impairment of memory. Cerebral atrophy is observed in CT test. Renal dysfunctions such as hematuria and proteinuria are also reported (“CERI Hazard Data Collection” 96-4 (1997)). SGOT increase, hepatotoxicity accompanied by fatty degeneration of hepatocyte and lymphocyte infiltration, etc. is reported as well (EU-RAR No.30 (2003)).

**Aspiration respiratory hazard**

Toluene is hydrocarbon. Kinematic viscosity (calculated value) is 0.65 mm²/s (25 °C).
12. Ecological Information

Persistence and Degradability
- Degradation: 112% to 120% by BOD

Bioaccumulative Potential
- No data available

Ecotoxicity
- Crustacea (brown shrimp) EC50=3.5 mg L⁻¹/96 hours (EU·RAR (2003))

13. Disposal Considerations

- Dispose this reference material in accordance with applicable legislation and local government ordinance.
- Dispose a container after thoroughly removing its contents.

14. Transport Information

UN Number: 1294
UN Classification: Class 3 (Flammable liquids)
Shipping Name: Toluene
Packing Group: PG II
ICAO/IATA: Class 3 Group II
Marine Pollutant: Not applicable
Precautions: Transport this reference material carefully while keeping it away from direct sunlight and paying due attention to avoid accidental release due to dropping and turning over and fire.

15. Regulatory Information

- Fire Defense Law
  - Dangerous Material Class 4 Class 1 Petroleum (water insoluble) Danger Rating 2
- Poisonous and Deleterious Substances Control Act
  - Deleterious Substance Packing Group 3
- Industrial Safety and Health Law
  - Article 57-2 (Enforcement Order: Article 18) Hazardous substance whose name, etc. must be labeled.
  - Article 57-2 (Enforcement Order: Article 18-2) Hazardous substance whose name, etc. must be notified No. Hazardous substance whose name must be notified: No.407, Hazardous substance whose name etc. must be indicated, Dangerous/Flammable substance
  - Ordinance on the Prevention of Organic Solvent Poisoning: Type 2 Organic Solvent
- Ship Safety Law
  - Flammable Liquids
- Act for the Prevention of Marine Pollution and Maritime Disasters
  - Enforcement Order Appendix 1 Hazardous Liquid Substance Class Y Substance
- Offensive Odor Control Act
  - Enforcement Order: Article 1 (Specific Offensive Order Substance)
- Narcotic and Psychotropic Drugs Control Act
- Raw material of narcotic and psychotropic drug
- Export Trade Control Order
  - Appendix 2: No.21-3 Item with export approval
- The Act on Confirmation, etc. of Release Amounts of Specific Chemical Substances in the Environment and Promotion of Improvement to the Management of Thereof
  - Specific Type 1 Designated Chemical Substance No.300

16. Other Information

Other
The information in this document is not intended to be exhaustive and is based on currently available information and data. The measures given in this document are applicable only to normal handling conditions. When handling this reference material under special conditions etc., it is recommended to take safety measures appropriate to each specific application and context of use. This document is intended to provide information and not intended to guarantee anything in handling this reference material.
