Safety Data Sheet

1. Identification of the Substance/Mixture and the Supplier

Supplier: National Institute of Advanced Industrial Science and Technology (AIST)
Address: 1-3-1, Kasumigaseki, Chiyoda, Tokyo, Japan
Office in Charge: Reference Materials Office, Center for Quality Management of Metrology, National Metrology Institute of Japan
Person in Charge: Certified Reference Material Staff
Telephone No.: +81-29-861-4059 Fax No.: +81-29-861-4009
Emergency Contact: Same as above

Prepared on: Aug. 29, 2007 Revised on: March 31, 2017
ID Number: 5007001

Identification of the Material: Certified Reference Material NMIJ CRM 5007-a
Recommended Use of the Chemical and Restriction on Use:
Poly(ethylene glycol) 1500

Do not use this reference material for other purposes than testing/research.

2. Hazards Identification

GHS Classification: Skin corrosivity/irritant : Class 3
Severe damage to eyes/eye irritant : Class 2B

GHS Label Elements: -
Signal word: Warning
Hazard and toxicity: Eye irritant
Mild skin irritant

Other hazard and Toxicity: When handled under normal condition, hazard is low
Large amount intake harmful
Combustible

Precautionary statement: [Preventive measures]
Avoid open flame or fire sources due to the combustibility
Avoid contact with oxidizers
[Response]
If swallowed: Drink a large amount of water and induce vomiting. Get medical advice.
If in eyes: Rinse carefully with water for few minutes, then, if contact lenses are inserted, remove them if possible,
and continue rinsing.
Wash hands after the handling
If eye irritation persists or skin irritation occurs, get medical assistance

[Storage]
Protect from light, clean place at the temperature below 25 °C. If storing for considerable length of time, refrigerate at the temperature below 5 °C recommended.

[Disposal]
Outsource to a professional industrial waste disposal contractor licensed by the prefectural governor.
Hazardous and toxic properties not specified in the above are neither the object of the classification nor classifiable.

3. Composition/Information on Ingredients

4. First-aid Measures

If in eyes : Rinse with plenty of clean water. Get medical assistance.
If on skin : Rinse with plenty of clean water. Take off the contaminated clothes and shoes, etc. Get medical assistance.
If inhaled : Move to get some fresh air, rest, keep warm. Get medical assistance.
If swallowed : Drink water or saline solution to induce vomiting. If unconscious, do not take anything. Contact medical doctor.
Anticipated acute and delayed symptoms : *
Most important characteristics and symptoms : *
Measures to be taken to protect the person:

- Use personal protective equipment such as rubber gloves, side shielded safety goggles, etc.

5. Fire-fighting Measures

**Extinguishing media**: Powder, alcohol-resistant foam, carbon-dioxide, sand, water spray

**Specific hazards at the time of fire**: Neither flammable nor ignitable under general condition. When possible, to avoid inhaling carbon monoxide, NOx, CN, etc. in flammable gases, extinguishing activity should be on the windward side

**Specific extinguishing measures**: Remove fire sources and extinguish using appropriate agent compatible with the substance. Movable container should be transferred to a safe place promptly. If impossible to transfer, use water spray to cool the periphery. Extinguishing activity on windward side to avoid inhaling toxic gases.

**Protecting fire-fighting personnel**: Protective clothes, air breathing apparatus, self contained compressed oxygen breathing apparatus, rubber boots

6. Accidental Release Measures

**Personal precautions**: Promptly remove any fire source from around the substance. Ready for a fire by keeping an appropriate extinguisher at hand.

**Protective equipment and emergency procedure**: If released indoor, ventilate well until the treatment is completed. Use appropriate protective equipment to protect the skin from the airborne droplets and avoid inhaling dust and gas

**Environmental precaution**: To prevent causing environmental impact, the spilled material should not be released into rivers, etc. directly. The contaminated waste water should be treated appropriately before discharged to the environment.

**Recovery, neutralization**: Open flame or other sources of ignition prohibited. The spilled liquid should be adsorbed to waste cloth or to sand and soil and wiped off completely. Everything used to clean up the spillage should be collected in an airtight container; then wash away with a large amount of water.

**Measures to prevent secondary accident**: -

7. Handling and Storage

**Handling**

**Technological counter measures**: Avoid contact with strong oxidizers

**Local ventilation/ general ventilation**: Use local exhaust ventilation system when handling indoor.

**Precautions for safe handling**: The container should not be handled roughly, no
dropping, knocking down or dragging. Prevent leakage, spillage or overflow that causes fume to form. Seal the container after the use. Wash hands and face, etc. well and gargle after the handling. Take off the contaminated protective equipment used when handling before entering the rest area. Entering the handling area only by the authorized persons. Use appropriate protective equipment to prevent inhaling, coming in contact with eyes, skin and the clothing.

Storage
Appropriate condition : Protect from light, clean place at the temperature below 25 °C. If storing for considerable length of time, refrigerate at the temperature below 5 °C recommended.

Material for safe packing : Polypropylene

8. Exposure Controls/Personal
Consideration for the safety management
Not established
Occupational exposure limit
Not established
Facility engineering
◇ Storage precaution
 • Protect from light in clean and sealed condition at room temperature
 • If discharging dust, seal the source and install local ventilation system.

Protective equipment
 • Protective mask, protective gloves, protective eyeglasses, protective eyeglasses with side shields (goggles, if necessary), protective clothing.

9. Physical and Chemical Properties
 • Appearance, etc. : Solid
 • Color : Colorless
 • Odor : No data
 • pH : No data
 • Melting point : No data
 • Boiling point : No data
 • Flashing point : No data
 • Explosive range : No data
 • Vapor pressure : No data
 • Relative vapor density (Air=1) : No data
 • Specific gravity or bulk : No data
10. Stability and Reactivity
◇ Stability
   ・ No data available
◇ Reactivity
   ・ No data available
◇ Conditions to avoid
   ・ Sunlight, heat
◇ Hazardous decomposition products
   ・ Carbon Monoxide

11. Toxicological Information
Acute Toxicity Intravenous cat TDLo : 1000 mg/kg (RTECS)
Skin corrosivity/irritant Skin irritation rabbit 500 mg/24H mild (RTECS)
Damage to eyes/eye irritation Eye irritation rabbit 500 mg/24H mild (RTECS)

12. Ecological Information
Degradability, concentration
Degree of degradation : 56 % by BOD(n=4) (METI: Safety Examination of Existing Chemicals and Safety Programmes in Japan)
Degree of degradation : 53 % by BOD(n=10) (METI: Safety Examination of Existing Chemicals and Safety Programmes in Japan)
Bioaccumulation : No data available
Ecotoxicity : No data available

13. Disposal Considerations
   Incineration method : Dissolve the material in flammable solvent and spray it into an incineration chamber equipped with a scrubber. Its waste water should be drained after activated sludge method is taken.

14. Transport Information
UN Number : Not applicable
UN Classification : Not applicable
Material name :
Precautions : Transfer with caution by avoiding direct sunlight and fire source at the temperature below 25 °C. Protect from leakage or spill due to fall or
15. Regulatory Information

None

This SDS is originally prepared for the use of the material in Japan, thus the stated laws and regulations are stipulated and carried out in Japan. The use of the material in other countries should be referred to and by application of the relevant laws and regulations of the country in which the material will be used.

16. Other Information

Other

The information in this document is not intended to be exhaustive and is based on currently available information and data. The measures given in this document are applicable only to normal handling conditions. When handling this reference material under special conditions etc., it is recommended to take safety measures appropriate to each specific application and context of use. This document is intended to provide information and not intended to guarantee anything in handling this reference material.
